

New officers get council nod

By DON RUSSELL and
GREGG GARBER
Universe Staff Writers

ASBYU Executive Council members were filled Thursday when council approved Pres. Bob Adams' appointments of Craig Adams as social vice president, and Jim Adams as finance vice president. The council's approval of both appointments was unanimous. Adams said he felt Mecham was an unusually well-qualified for this position.

Appointment of Adams to the post was approved beforehand by a committee consisting of Henrie, Finance Vice Pres. Jim Adams, and Student Government Michael Witker, Henrie told council.

Appointees take office Tuesday.

Following over his new post, Adams went to keep the boat going in the direction for the first three months. Then, we'll make the boat what we need to make."

Adams, a senior in history from Provo, Calif., first started working in the Social Office in September at request of Pederson. Since that time, he has become chairman of the Budget Committee.

Pederson said Adams is a good organizer and will make a fine council member. "His ability to work with people will allow him to efficiently use the resources of the present office staff."

"I don't want this to be a 'patch-up job,'" said Adams, "I want the office to run smoothly. Besides, Jim has really done a great job and that will make the transition easier."

Adams said he expects the next three months to be a great experience. "Although he has never taken an accounting class, he proved his expertise in his fairness and ability to evaluate the proposals while serving as the budget chairman," said Pederson.

The main purpose of the ASBYU constitution, is to "supervise the ASBYU budget."

As comptroller of all ASBYU offices, Adams and his staff face their first big task next week when they begin auditing all of the ASBYU offices. The Social Office will be first.

In the meeting where Adams and Madsen were approved, Henrie stressed to the council the fact that the new executives have all the same rights and responsibilities as past vice presidents in their respective offices, and requested that the motions to approve Mecham and Adams include a

Universe photo by Boyd Goutley
Cleve Adams... new finance vice president.

statement to that effect.

"They are full-fledged vice presidents," he said.

Additional council business included the approval of three ASBYU Traffic Court justices.

De Von Tu'u, a freshman in open studies from California, Tom Coop, a junior in psychology, and Laurie Olson, a junior art major from California, were approved.

Henrie encouraged the new justices to focus on fairness and professionalism.

Ombudsman Steve Madsen proposed the addition of a section in the council bylaws stipulating that appointed ASBYU officers be required to resign from office when running for an elected office.

Church plans aid for quake victims

The LDS Church's Developing Welfare Services Department will meet this morning to decide what aid is needed by the members of the church in Guatemala, the press relations director for the church said Thursday.

"A member of the Developing Welfare Services Department has already been sent to Guatemala to assess the needs of the members there and to consult with church officials in that area," Press director Jerry Cahill said.

Universe photo by Quinn Orr
Jeff Green, a sophomore majoring in electrical engineering from Arvada, Colo., and Gary Goetz zero in on Guatemala with ham radio.

Food distributed

Cahill said Priesthood leaders were presently distributing corn and beans to the needy church survivors.

He reported that most of the 15 members who were killed were from Patzún, about 40 miles west of Guatemala City. He also said the chapel in Patzún was destroyed by the quake.

Cahill said Randall Ellsworth of Rockville, Md., a missionary for the church, was seriously injured during the earthquake. Cahill said, however, that no further reports have been received by the church as to what his present condition is.

A story by the Associated Press said an Emergency Rescue Committee official reported that at least 2,000 persons were killed in the quake and 3,000 more were injured across the country.

A volunteer worker in the Guatemala City area said, "We'll never know how many died for sure. Fifteen of every 100 bodies sent to the morgue are not being identified."

Dead buried quickly

Acting under a government appeal to forget about the legacies and bury the dead as quickly as possible, earthquake survivors lined up at the Guatemala cemetery bearing coffins of relatives and friends Thursday.

The epicenter of the quake was located 30 miles southwest of the capital.

The worst damage in Guatemala City was to the run-down central area where the poor usually buy their food day by day. Many shops and markets were destroyed, and food prices shot up in the few stores that opened up for business.

Communication between BYU Guatemalan students and their families through BYU's Ham Radio Club, has helped some of the students set their minds at ease concerning their family's safety.

The club contacted some Guatemalan students Thursday offering to relay messages concerning the condition of their families following Wednesday's earthquake, according to Jeff Green, the club's vice-president.

Although Maria Paredes and her brother Sergio have been living with their family in Dallas, Tex. for a number of years, they still have a grandmother and uncles in Guatemala. Miss Paredes planned to use BYU's ham radio facilities Thursday night to find out more about them. Concerning the earthquake, Miss Paredes said, "I am shocked, but on the other hand, not too shocked, because the volcanoes do activate... so people know there's danger."

Her brother agreed and said, "It's not unusual for Guatemala to have earthquakes, but not like this one."

Miguel Rodriguez, has a brother in the mission home in Guatemala City and says there is "no telephone there," so he hasn't talked to him yet. His mother lives in Cunen, 150 miles from Guatemala City. "I'm sending her a telegram but it will take two or three days. There are no telephone lines in Cunen."

Sonia Soto has parents and brothers in Guatemala. "I called every half hour yesterday until two in the morning," she said. The BYU ham radio reached her home but no one was there she said, so they made inquiry and found out her family and house were all right. "But I still want to talk to them and find out everything," Miss Soto said.

Guatemalan students who have not been contacted and wish to send any messages should call the Ham Radio office at BYU extension 3415, he said, or come to 181 ELWC.

Spring, summer term applications available

term class schedules, request forms, and scholarship applications are available at the Student Office, B-162, and at the bookstore.

request forms, and scholarship applications are available at the Student Office, B-162, and at the bookstore.

GPA of 3.85 or above could receive up to \$170 per term. Those with a cumulative GPA between 3.6 and 3.85 could possibly receive \$100 per term.

"These are just projected guidelines," Parker said. "We're never sure exactly where the cut offs will be until all the applications are in."

Spring term has two priority deadlines for

registration. The first is March 15. Students submitting their request forms before then will receive their confirmation form in the mail around April 2, Bell said.

The final deadline is April 9. Students submitting their class request forms by this date will pick up their confirmation forms in the mail around April 14-16, he said.

Preference tickets on sale Saturday

By DEBIE RICHARDS
Universe Staff Writer

Winter Preference tickets will go on sale Saturday at 10 a.m. at the Wilkinson Center third floor ticket office.

According to Andrea Osinchak, policies for distributing tickets to the dance will be strictly adhered to. "There will be

no exceptions made," the Preference chairman said.

One I.D. will be allowed per girl, and one ticket per I.D. This will admit the girl to one of the dances, while men are free to attend both nights. The dances will be Feb. 20 and Feb. 21.

Girls will not be able to save places in line for their friends, Miss Osinchak said there will be people watching the lines. A number system will be used to help keep people in the line. Girls are encouraged, Miss Osinchak said, to bring a book and stay in line.

Miss Osinchak stressed that "each location is unique and original enough to provide an atmosphere comparable to the Skyroom." She said that a lot of work has gone into selecting each location.

Table displays on the ELWC third floor will give an idea of how each location will be decorated.

The locations for the dances on Friday and Saturday nights are the Main Ballroom, ELWC (with 1,500 tickets available), the Skyroom (100 tickets available), and the Utah County Courthouse (250 tickets).

Physicist to address Y students

A Nobel-Prize-winning physicist will present an illustrated lecture on "What Is Matter Made Of?" at Tuesday's Forum Assembly in the Marriott Center.

The 10 a.m. assembly will feature Dr. Murray Gell-Mann, professor of Theoretical Physics at the California Institute of Technology. He will speak on the discovery of subatomic particles and the search of scientists to find order to these particles.

Dr. Gell-Mann won the Nobel prize in 1959 for his work on the theory of elementary particles.

He is a member of the National Academy of Sciences, the American Academy of Arts and Sciences, the American Physical Society, and the American Institute of Physics. He has also served as a member of the National Aeronautics and Space Administration.

Resources not utilized, energy advocate says

We must not only conserve energy but use sources that have not yet been developed, said Dr. Dixy Lee Ray in a speech to faculty and students Thursday.

Dr. Ray, former chairman of the Atomic Energy Commission, spoke to an estimated crowd of 300 in the ELWC Ballroom.

"The human mind is our unlimited resource," she said. "We've forgotten that resources are not resources until they're utilized."

"We can make resources," she said. She pointed out that the clothes we wear are not

made of natural materials only, but of man-made synthetics as well.

Possibility of new energy resources were discussed by Dr. Ray. Potential sources include increased strip mining of coal, nuclear energy, solar energy, windmills, waves and tides, thermal energy, hydroelectric dams and ocean currents.

Discussing her specialty, Dr. Ray pointed out that nuclear power is a reality, because of technological

advances made in the last 20 years.

Says nuclear power safe

Scare headlines, said Dr. Ray, have led many people to believe that the power potential of "a hundred million fleas" was near to that of an elephant. "Which would you rather harness to pull a load?" she asked. It's equally difficult to harness the diffuse energy of the sun's rays.

"Because of safety systems and regulations there has never been a fatality in the development of nuclear energy," Dr. Ray added.

We have problems with solar energy because it's hard to collect, said Dr. Ray. By analogy she pointed out that the power potential of "a hundred million fleas" was near to that of an elephant. "Which would you rather harness to pull a load?" she asked. It's equally difficult to harness the diffuse energy of the sun's rays.

Advocates conservation

Energy conservation requires not only limited use of present resources but also a recycling of the resource, said Dr. Ray. The recycling of waste materials is becoming a valuable energy source. "Some 45,000 homes in Chicago are being heated from recycled sewage," she said.

Y's Guide... 10-13

Family life topic of book-up

By REBECCA STONE
Universe Staff Writer

Today's Family Life Education conference for Professionals will begin at 1:30 a.m. with a lecture over the telephone. Dr. Richard Kerkhoff will speak from Purdue University on "Do You Remember the American Family?"

According to Dr. Terry Olson, chairman of the conference, snow and ice are preventing the lecture from being given "in the flesh."

A system will be set up, however, for Kerkhoff to speak to students in the step-down lounge, SFLC as well as answer questions.

Dr. Elmer Knowles will speak in 1245 FLC on "Strategies for Teaching Courtship

and Marriage." Duane Boyce will speak at 1:30 p.m. on "Literature in Family Life Classes," and Owen Cahoon will present "Tactics for Teaching Parenting Skills" at 2:45 p.m.

Educators were told Thursday morning to avoid espousing any one set of values in the public schools.

Dr. Olson, chairman of the Family Life Education Conference for Professionals said he is "concerned about values we hold and values of students."

Dr. Olson said advocating certain value systems in the classroom isn't justified because they aren't universal. Even within the same group, he added, members don't prize values equally.

But a value-free teaching environment isn't

desirable or even practical, Dr. Olson said. "Values seep through the floor boards" and can't be ignored, he said, adding that the proper approach is to create an open forum atmosphere in the classroom.

The ideal is to utilize various student values without ignoring or imposing them, Dr. Olson said. Fairly acknowledging all values presented is the duty of the teacher, he said, stressing there must be "mutual respect and a flow of feeling" when values are discussed in the classroom.

Two graduate students, Randy Chetlain and Terry Baker demonstrated "Involvement Techniques" and "Teaching Communication Skills." Baker's approach included role-playing illustrating mechanisms which break down communication.

Y grad files for House

A BYU graduate has filed his candidacy for the Republican nomination to Congress, for Utah's First District.

Steven E. Nielson, who now resides in Provo, will seek the right to face Democratic incumbent Gunn McKay in November.

Nielson received his B.A. from BYU in 1974 in contemporary U.S. history. He also owns a local clothing store, mail order company, and a theater in Spanish Fork.

He spent a year in a California law school following graduation, then returned to Provo.

He said he would concentrate on economic issues in his campaign. He also said he thinks "government bureaucracy is too large," that he favors a balanced federal budget, and is for giving more power back to the states. He also expressed support for BYU's position on Title IX of the HEW regulations.

Resort study now available

Ten copies of the sociological impact study on the proposed Four Seasons Ski Resort project are available in the Reserve Library.

"Copies may be checked out for 10 days," said Marvin Wiggins, general reference librarian, "but the time may be cut back to three or four days if the demand gets high."

Copies of the report are also available in the Provo Public Library, said Wiggins.

LOW COST HOUSING

Mobile home repossession. Merely pay the past due amount to the bank and take over monthly payments on these like new homes. An easy way to solve your housing problems. Good credit, over 21, and steady job a must!

Dateline

By THE ASSOCIATED PRESS

Global terrorist network reported

LONDON — Secret reports to members of the North Atlantic Treaty Organization say an international terrorist network is operating globally with help from radical governments.

The reports were submitted by the intelligence and security agencies of individual NATO governments, and the headquarters of the alliance pooled and collated them.

Record snowfall hits San Francisco

SAN FRANCISCO — Incredible residents awoke Thursday to see snow-covered palm trees and a glazed No. 10 Hill after the biggest snowfall in exactly 89 years hit the city and surrounding areas.

Amazed children joined in snowball fights, and one or two daredevils tried gliding down San Francisco's hills on skis before the snow started to melt.

Small producers get gas price break

WASHINGTON — The House voted Thursday to lift price controls from small gas producers, who conduct 75 percent of new exploration, but increase controls over the big companies which enjoy 75 percent of production and sales. The Federal Energy Administration estimated an uncontrolled price for small producers would have little effect on consumer gas bills.

Banker testifies in Hearst trial

SAN FRANCISCO — The first witness in the Patricia Hearst trial took the stand Thursday to describe the fast-paced bank robbery in which the young heiress is accused of taking part. James Smith, manager of Hibernia Bank's Sunset Branch was the prosecution's first witness. He began his testimony by describing the bank and recounting the first signs that a robbery was in progress.

French send troops to colony

DJIBOUTI, Territory of the Afars and Issas — France airlifted 800 reinforcements Thursday to its garrison of 4,000 men in this strategic Red Sea colony following a shootout on the border of the neighboring, Soviet-backed Peoples Republic of Somalia. Heavy forces were reported deployed on both sides of the border after French soldiers killed seven gunmen Wednesday in a clash near the Somali border.

Flu outbreaks milder; fewer cases reported

BYU students and Utah County residents can expect a comparatively milder flu season this year.

Dr. Cloyd Hoffheins, director of the BYU Health Center, said, that compared to last year at this time, fewer cases of influenza among BYU students have been reported.

"The influenza season reaches its peak about February or March," said Dr. Hoffheins. "Those cases reported so far have been fewer than last year and relatively milder."

Stafford Smith, spokesman for the Center for Disease Control in Atlanta, Ga., said that despite scattered outbreaks of the virus in six states and isolated cases in several others, "we'll be very surprised if there's any big flu season this year."

"Students should maintain a healthy diet, get adequate rest and have sufficient exercise," warned Dr. Hoffheins.

Wymount fight sparks shots

Shots heard in the vicinity of Wymount Terrace Wednesday night were the result of a family argument in which no one was injured.

According to Provo Police Chief S. W. Nielsen, the Provo Police Tactical Squad was dispatched around 10 p.m. to assist BYU Security in the search for a BYU student. The student had fired an automatic pistol into some books in his Wymount Terrace apartment earlier in the evening Nielsen said.

Nielsen said the young man was found in a Desert Towers restroom about 1 a.m. Thursday.

No arrests or charges were made as a result of the incident.

The whole episode has been blown out of proportion by the media, according to BYU Security Chief Robert Kelshaw.

Willie Horton of the Detroit Tigers led American League designated hitters in 1975 with 25 home runs.

Right-handed pitcher Luis Tiant of the Boston Red Sox is the second "Luis Tiant" to pitch in major league parks. His father, a southpaw, pitched in them with the New York Cubans of the Negro National League in the '30s.

Drive on to boost Y voting

By DON SMURTHWAITE
Universe Staff Writer

The campaign to increase voter turnout in the coming student election is progressing well, according to Chris Tew, chairman of ASBYU Election Committee publicity.

"It's moving right along," said Tew. "It's hard work, but we're making some headway."

Highlighting the campaign will be the nominating convention and a Elections Night Rally and Dance, Tew said.

The nominating convention is

scheduled for Feb. 20 in the Central Ballroom, ELWC, said Roxi Stanley, of the Elections Committee.

The Cougar Band and a special guest speaker will appear at the convention, Miss Stanley said. "The speaker we're trying to get will surprise a lot of people," she said.

Candidates will be formally nominated at the convention by their campaign managers. The candidates will also briefly present their platforms, said Miss Stanley.

The Elections Night Rally and Dance is a new idea, said Miss Stanley. The

evening will include "lots of free food the Cougar Band, a dance and rally she added.

Voting booths will be open from a.m. to 9 p.m. during March 3-5 for primaries, said Tew. The final election will be March 8-13, he added.

Tew also said different clubs and organizations will man the booths all year. The clubs will be free to decorate the booths in any manner they see fit, Tew said.

Tew also said this year's election will receive extensive local radio coverage and said he is hoping for television coverage, too.

Handbook of student services to be distributed this weekend

ON SMURTHWAITE
universe Staff Writer

Handbook explaining
services available to
students will be distributed
this weekend, according to
U Pres. Bob Henrie.
The handbook, titled
"The Y," will be
distributed to apartments,
and houses, said the

booklet's editor, Carolyn
Bench.
"We'll be knocking on
doors, giving them away,"
said Miss Bench, a junior
Business Education major.

One per apartment

"We planned to provide
one booklet per apartment so
every student will have access
to one," Miss Bench
continued. "However, we
hope that students will try to
limit themselves to one

booklet per apartment."
About 14,000 copies of the
handbook were printed, she
said.

The handbook includes a
list of the specific services
available to the student, the
times the services are
available, locations, phone
numbers, costs, and
restrictions.

The booklet also lists
practical phone numbers, a
map of campus, a listing of
student government services, the
 Cougar fight song, an

overview of each ASBYU
office, and space for writing
important phone numbers,
Miss Bench said.

Student idea

"The idea for the booklet
originally came from a
student, Kris Cassidy, who
wrote a letter of suggestion to
student government," Henrie
said.

"We're proud that we've
done something with student
input," he said. "This is what
student government is all
about."

Cost of the project was
about \$2,000, according to
Henrie. The graphics and
printing were done at
University Press.

Miss Bench said the
information in the handbook
is valid for the remainder of
this semester, as well as the
spring and summer terms. She
also said she believes the
material will be useful next
fall and winter.

Information permanent

"Most of the handbook is
pretty permanent," she said,
adding that she hopes future
student government leaders
will revise and update the
handbook.

Students who do not
receive a copy of the
handbook can pick up a copy
next week at tables near the
entrance of the JKB, MCKB,
or the ELWC Step-down
lounge, said Miss Bench.
Henrie said he hopes
students will take advantage
of the booklet.

"Students will be surprised
to see how useful a service
handbook of this nature can
be," he said.

Centennial Celebrities

Brent F. Larsen was
chairman of the Art
Department for 30 years. He
retired in 1958, after nearly
50 years of service to BYU.

As an artist, he looked for
the beauty in the world
around him. "This
is a loveliness," he said, "is a
source of happiness for those
who have learned to see and
understand it."

In a story entitled "People
Who Had No Soul," he
illustrated what he meant.
The story told of an artist
who traveled in search of
something to paint. He came
upon a picturesque farming
village in a mountain valley.

The artist went with the
people to their fields and
watched and listened to the
simple beauty about him. He
saw the sunset and the tinted
mountains. But he also saw
that the villagers never raised
their eyes.

Meets disappointment

He painted what he saw
and "envisioned a sort of
sacred beauty, something far
beyond mere prettiness."
When he had completed the
paintings he set them before
the villagers, but "they
ignored his creations and even
shunned his presence."

"We store up food," they
said, "against the coming of
the winter. We are interested
in the practical and useful. If
we do our duty we have no
time nor desire for the
frivolous and the wicked. The
pursuit of beauty is to give
ourselves to vanity."

The story says the artist
left the village, but that a
poet came up and found
the same loveliness. He wrote
of the things which the artist
had seen and set the lines to

Universe art by Guy Wymore

Brent F. Larsen ...
former art chairman

music that the people might
sing.

But the people told the
poet, "Our fathers and their
fathers back to the founders of
this village lived as we live.
They toiled by day and rested
by night. They repaired their
barns, enlarged their fields
and attained security against
winter and famine. We desire
nothing more."

A poet's prayer

At this, the poet "pleaded
with God to have mercy on
these helpless people because,
as he said, they have no soul.
They are like the animals in
the forest and the beasts of
burden in their own stables.
They have bodies adjusted
only to the tasks of securing
temporal food, but their
spirits lie crushed and
dormant. How can man have
a soul unless his spirit and
body work together, play
together, love together, hope
together, pray together?"

Desk lists events

Students can find out
what's happening on campus
by checking the signs behind
the Information Desk in the
Wilkinson Center. Activities
are listed under Sports,
ASBYU and Fine Arts.

Norma Elliott, information
desk supervisor, said the
listings are updated "whenever
we find out something new."

She said the information desk
gathers items by checking
with different departments,
University Relations, the
Business Office, the
scheduling office and by
checking newspaper listings,
both on and off campus.
The booklet "Inside the
Y," lists services within the
university community.

Increased energy cost attributed to addiction

The rising cost of energy is
because of increasing demand
for resources and decreasing
value of currency, according
to B. Z. Kastler, president of
Mountain Fuel Supply Co.
"We have become addicted
to energy," Kastler said, "and
any form of addiction
becomes expensive." Kastler
further pointed out that the
U.S. is more dependent on
foreign oil today than it was
at the time of the Arab
embargo.

Turning to economics,
Kastler asserted that the
decreasing value of money in
the U.S. is the single most
significant cause of the
nation's energy problems.
Concerning the role of
government in energy policy,

Kastler said that Congress is
eliminating many incentives
for exploration at a time
when new sources of energy
are really needed.
"If the theory that big
business ought to be busted
up is true," Kastler
exclaimed, "then we ought to
start with the United States
government and do some
busting there!"
Kastler was promoted to
president and chief executive
officer of Mountain Fuel
Supply Co. in May 1974.

NSA speaks your language

We'd like to think that those of you who are
skilled in Slavic or Asian languages could
challenge the accuracy of the above translations.
Not only Slavic and Asian, but also Middle
Eastern languages are being read and written
daily at the National Security Agency.

We are accepting applications from graduate
linguists skilled in the languages we've just
mentioned. Spoken fluency is not essential at
NSA, but knowledge of idiomatic, colloquial and
dialectal variations is highly desirable.

The National Security Agency offers a variety of
challenging assignments for language majors ...
translation, transcription, area research projects
to name a few. The newly hired linguist receives
advanced training in his primary language and
can anticipate many years of professional growth
within the NSA Language Career Development
Program.

Intellectual challenge is part of NSA's language
too ... plus attractive surroundings in our
suburban Maryland headquarters ... salaries
that start at the GS-7 level for graduates with a
BA ... and all the usual benefits of Federal
employment.

Schedule an NSA interview through your
Placement Office or write: Chief, College
Relations Branch, National Security Agency,
Fort George G. Meade, Maryland 20755. Attn:
M321. An equal opportunity employer m/l.

Census finds fewer children, but more below poverty level

WASHINGTON (AP) — Although there are fewer children in America today than there were five years ago, a larger percentage of them are poor.

MOUNTAIN MOTORS

130 S. State, Orem 225-3880

This is one of the conclusions about poverty, child health care and family structure documented in a new publication called "America's Children 1976."

The 90-page book, sponsored by the National Council of Organizations for Children and Youth, is based on federal Census Bureau material. It outlines how changing attitudes about women, a rising divorce rate and several years of economic uncertainty have affected the nation's 66 million children under 18.

Some of the findings are: During 1974, about one in six children in America lived in families whose income was below the official federal poverty level, \$5,038 for a family of four. This compares with about one in seven children in 1970.

Ten million children, about one in six, were being raised by a single parent in 1974. This compares with about one in seven children four years earlier.

Although the infant mortality rate has dropped about 25 per cent since 1960, it is still twice as high for nonwhite children as white children.

In 1975, about two out of five children had mothers in the labor force, a 12 per cent increase over 1970.

The council, a coalition of 180 volunteer organizations concerned with children's issues, reported that because of a falling birth rate, the number of children under 18 decreased by 2.4 million, or 3.4 per cent from 1970 to 1974.

The council also reported that in 1974, 10.1 million, or 15.5 per cent of the nation's children lived below the official poverty line, up from 10.2 million, or 14.9 per cent, in 1970.

One children's advocate, Dr. Ken Keniston, said the most obvious reason that there is a larger percentage of poor children in the country today than there was a few years ago is because of the economic recession. "Everyone is worse off," he said.

A more subtle reason, said Keniston, who is chairman of the Carnegie Council on Children in New Haven, Conn., is that there are more government spending programs for older Americans who thus are moving out of poverty. "One simple answer to why so many people over 65 are doing better is because of large government spending programs like Medicaid and Social Security," he said. "But we have no notion of entitlement to a decent standard of living for kids."

Summer jobs available in recreational areas

Summer will bring good opportunities for student job placement in parks and recreation facilities throughout the nation.

A spokesman for Opportunity Research, a placement-research center in Kalispell, Mont., said the country's improving economy will provide more than 50,000 summer jobs at national parks, state parks, dude ranches and private summer camps.

Interested students should send a self-addressed envelope to Opportunity Research, Dept. SJO, 55 Flathead Drive, Kalispell, Mont. 59901.

He said students should apply before April 1, since many of the good jobs go fast.

The spokesman said the improving economy will encourage literally millions of families to head for vacationland, U.S.A.

City to discuss resort zoning

The Provo City Commission will hold public hearings Feb. 17 on zoning of the proposed Four Seasons base site.

The developers have asked that the area of the proposed base site be rezoned to a planned community zone, a type of zoning which applies to developments of 50 acres or more and has no restrictions except that city commissioners must approve all plans.

The city commission is the final approval body for the zoning.

Bottle buoys across ocean

CINCINNATI (AP) — Five years ago, Patrick Sandross put a note in a bottle and threw it into the Ohio River. Last month, he received a letter telling him the note had been read in Scotland. The AP drew up a random list of 15 commonly purchased food and nonfood items, checked the price at one supermarket in each of 13 cities on March 1, 1973, and has rechecked on or about the start of each succeeding month.

The latest survey showed some encouraging developments: —The price of the marketbasket at the checklist store declined in 10 of the 13 cities surveyed during January. The average decrease was 2.8 per cent. The bill increased in three cities: Albuquerque, N.M.; Boston and Detroit — with an average rise of just over 1 per cent. In December, the marketbasket bill increased in the checklist store in cities, up an average of 4 per cent. The bill dropped at the checklist store cities during the last of 1975.

Food prices dip in January

Consumers got a break at the dairy counter during January, as lower prices for butter and eggs helped cut the family grocery bill, an Associated Press Marketbasket survey shows.

The AP drew up a random list of 15 commonly purchased food and nonfood items, checked the price at one supermarket in each of 13 cities on March 1, 1973, and has rechecked on or about the start of each succeeding month.

Beasts abundant at Y's museums

DON SMURTHWAITE
Universe Staff Writer

A carnivorous Allosaurus
rears his neck, smiling
sedately. Towering above
a fourteen ground sloth
is a vulture-like, three-
clawed paw outward.
menacing jaws of a giant
odile hang open.
Several hundred yards
off, a Bengal tiger snarls,
its long, vicious fangs
minutely displayed. A
red-checked turaco,
dressed in soft reds, blues,
greens, clings to its perch.
opard gazes quietly to the

east.
A prehistoric panorama of
earth? A scene from the
plains of Africa? The San
Diego Zoo? The Cannon
Center at lunch time?
Not exactly. All of these
creatures, from the Allosaurus
to the turaco, can be found
on the BYU campus at two
locations - the Life Science
Museum in the Heber
Grant Building and the Earth
Science Museum in the
Eyring Science Center.

'Valuable things'

"We're storing the valuable
things of life," said Dr.
Wilmer Tanner, curator of the
Life Science Museum.
"There's great worth in the
material."

Dr. Tanner's office looks
representative of a man
involved in his work. Books,
journals, and boxes of
material cramp his quarters.
A calendar from 1970,
illustrated with pictures of
various lizards, partially
covers a wall. A pickled turtle
sits in a jar across the room.
The Life Science Museum

contains thousands of
specimens. Among the more
rare animals are a whooping
crane and the now-extinct
Utah Lake trout. And for the
ornithologists, there's a
genuine delight - a
yellow-bellied sapsucker.

Educational impact

Dr. Tanner said he feels the
value of the museum is in its
educational impact. "The
museum serves all ages. It
gives people the chance to see
things they might not
otherwise see," he said.

Dr. Tanner said the staid,
unchanging image of many
people have of museums is
unfair. "We don't put things
in there and leave them," he
said. "We grow and evolve."

The curator for the Earth
Sciences Museum is James
Jensen. He said he sees his job
as everything from "shoveling
junk out of the way to
planning long-range, exciting,
scientific programs."

Jensen said children are
especially excited about the
museum. "They're receiving
images and responding," he
said.

College students are more
sophisticated, and have more
diversified interests, said
Jensen. Even so, he said there
are not many BYU students
who haven't taken the time
to gaze at the huge form of
the ground sloth and let their
imagination run a little.

Diamond drill

Experts put the dinosaurs
together by using a diamond
core drill to pierce the center

Universe photo by Clark Knight

This lion extends an open-mouthed welcome to visitors at
the Earth Science Museum in the Eyring Science Center.

of the bones and running
steel cable through the holes.

Since the days of being an
hors d'oeuvre for a
tyrannosaurus rex are long
gone, the biggest challenge
facing the dinosaurs now is to
stay dust-free.

Keeping the big fellows
clean is a touchy situation,
said Duane Wilden, Eyring
Science Center custodian
supervisor.

"They're really fragile. We
have to be careful," he said.
The dinosaurs are cleaned
with a feather duster every
six months. Once a year, the
rocks they stand on are
washed.

How do the night
custodians feel about sharing
the evening rounds with
dinosaurs, giant alligators and
the like lurking around every
corner?

Students donate man hours to aid community services

By DON RUSSELL
Universe Staff Writer

BYU students have logged
11,839 volunteer man hours
in community service since
April of last year.

This figure has already
surpassed last year's total of
10,000 hours according to
Sylvia Law, ASBYU vice
president in charge of
community service.

Miss Law has set the goal of
16,000 hours to be reached
by April.
Volunteer service has two
strong benefits, says Miss
Law. The first benefit is that
the people in the community
receive the help they need
and secondly, the student
gets many rewards for
donating his services.

"Volunteer man hours are
significant because they are
concrete evidence of what
BYU students have done, but
they are insignificant because
they are history and there is a
lot more to be done," says
Miss Law.

The majority of BYU clubs
have participated in different
service projects, but all clubs
are always invited to search
out new and different
projects, Miss Law said.

She also adds, "Many of
the best service projects have
been when students
approached a member of the
office and asked what they
could do or said they had the
'greatest' idea. In other

words, students have had lots
of enthusiasm and projects
have been student-initiated."

The Office of Community
Service is working with many
projects simultaneously.

The Advocacy Program,
under the direction of Karen
Reid, is aimed at helping all
the mentally retarded
people in the Provo-Orem
area.

The prison APMS program
at the point of the Mountain
State Prison is just getting
organized, Miss Law said.

Y club to offer tax assistance

Beta Alpha Psi, a campus
accounting club, will help all
students, faculty and staff
with their federal income tax
forms.
According to Dennis Reber,
club president, the volunteer
income tax assistance will be
offered at no cost every
Thursday and Friday in 110
ELWC between 1 and 5 p.m.
until April 2.
Reber said Tax forms will
not be prepared, but that
assistance would be given in
filling them out.

International talent wanted

The Program Bureau is looking for
international student talent to form the
beginning of a new international troupe.
According to Gene Parrish, student
co-ordinator for the Program Bureau, it is
looking for international students to put
together a troupe that will highlight a
banquet held during International Week. This
could be the beginning of a permanent group
to be sponsored by the Program Bureau, he
said.

culture from the students' own lands, Parrish
said. It is looking for musicians, dancers, and
singers, yet auditions are open to any
international student who wishes to try out,
he said.

Audition forms can be obtained in the
Program Bureau office, 117 ELWC. Auditions
will be Friday, Feb. 13 from 2-6 p.m. and
Saturday, Feb. 14 from 10 a.m. to 2 p.m. in
109 ELWC.

For further information contact the
Program Bureau.

According to Robert W. Spencer, dean of Admissions and Records, the total number of daytime students has fallen slightly from last semester to 24,430. The drop is expected during winter semester and the administration is very pleased with this semester's enrollment and registration, he said.

This semester there are 13,170 male and 11,260 female students enrolled at BYU; 22,449 of them are undergraduates, and the remaining 1,981 are graduate and law students.

There are 568 new freshmen and 1,025 transfer students enrolled as daytime students. A daytime student is anyone who is registered for at least one daytime class and carries a minimum of three hours, said Spencer.

Law school enrollment is up from 292 last winter to 433 this semester. The law school is working towards an average of 150 students per class, and a total enrollment of 450. The number of women enrolled in law school is 20, according to Spencer.

Since 1970 BYU has been operating with a ceiling on the total of daytime students at 25,000, upon the direction of the university's Board of Trustees. According to Spencer, BYU has been able to serve enrollments within one to two per cent of this total.

Spencer said that enrollments have fallen into "quite a comfortable pattern." He said admissions keeps a tracking system on all students admitted and enrolled to better calculate estimates of the numbers of students accepted and those who decide to come.

Out of the freshmen BYU accepted, 84 to 85 per cent enroll. According to Spencer, this is one of the highest freshmen enrollment rates in the country and it can be attributed to BYU's follow-up program.

Once a new freshman is accepted, according to Spencer, there are a number of planned contacts between the student and the university, either through the "Buddy" system or letters from the advisement center. The Buddy system uses BYU students returning home between semesters and asks them to contact entering freshmen about their home states.

The rate of new transfer students who are admitted and subsequently enroll is 75 to 76 per cent. Although this rate is high in comparison to other schools, according to Spencer, BYU is working on a program that will increase this ratio and better serve those who apply, he said.

According to Spencer, BYU's Transfer program is unique in the fact that when a student is accepted from another university, he automatically receives an evaluation form indicating how his credits have transferred and how his GPA has been calculated.

"In 99 per cent of other university transfer programs, the student has no idea of his standing until after he arrives on campus," said Spencer.

"This semester's enrollment and registration was completed with the least problems ever," said Spencer. "The system was able to accommodate more students, allowing individuals with specific problems to receive individualized attention," he concluded.

Blind lady employed as teacher

MARION, Ind. (AP) — Linda Garshwiler said all she wanted was a chance to prove a blind person can do the good that teacher. Now she has that chance.

"I'm just really excited that I have the chance to be in the classroom and prove to everyone that I can do the job," she said this week.

Miss Garshwiler, 23, will go to work at Justice Junior High School here, teaching English literature and grammar to seventh and eighth graders.

Miss Garshwiler, backed by the National Federation for the Blind, filed a suit in federal court last year against Marion's school system, claiming she was discriminated against because she can't see.

She applied for an opening and was scheduled for an interview, but the suit was canceled when school officials learned she is blind.

Mark Maurer, president of the Indiana Federation for the Blind, said Miss Garshwiler's job is the first full-time teaching position ever obtained for a blind person through a lawsuit.

He said about 400 blind persons are teaching in regular classes across the nation.

Wallace leads '76 hopefuls in total expenditures for '75

WASHINGTON (AP) — Eugene McCarthy: \$59,431; Gov. George Wallace of Alabama was both the most successful fund-raiser and most prolific spender of all the presidential candidates during 1975, according to records.

He took in \$3.92 million and spent \$2.92 million, topping his nearest rival by close to \$1 million, he reported in records newly filed at the Federal Election Commission.

He was one of five candidates to top \$1 million in receipts and expenditures, ranking ahead of Sen. Henry Jackson, D-Wash., Ronald Reagan, President Ford and Sen. Lloyd Bentsen, D-Tex.

Much of the spending by all candidates in 1975 was aimed at establishing campaign offices and raising more money for the primary and state convention battles of 1976.

Following for each candidate are total receipts during 1975: Total expenditures during 1975, and cash on hand at the end of 1975.

Sen. Brich Bayh: \$337,347; \$294,085; \$103,662. Sen. Lloyd Bentsen: \$1,000,036; \$1,603,897; \$49,091. Sen. Robert Byrd: \$0; \$0; \$20,000. Jimmy Carter: \$989,125; \$947,669; \$58,033. Sen. Frank Church: \$26,832; \$13,538; \$13,294. President Ford: \$1,688,256; \$1,473,450; \$214,806. Fred Harris: \$426,522; \$392,766; \$26,017. Sen. Henry Jackson: \$2,221,323; \$2,248,457; \$911,848.

Sanford: \$327,283; \$335,363; \$3,872. Milton Shapiro: \$283,878; \$280,369; \$3,509. Sargent Shriver: \$1,508,847; \$416,723; Terry

Uranium rates start new boom Terrorist sanctuaries risk cut-off of U.S. aid

BLANDING, Utah (AP) — Rising uranium prices have brought a new burst of exploration activity to Southeast Utah, raising hopes of a steady growth that will contrast earlier booms that turned to busts.

Old claims to uranium areas are taking on new importance as value as major companies lead the search for property that can be mined economically now that the price has risen. And county recorders in San Juan and Grant counties, for example, report new locations are being filed for by the hundreds.

"We've had the biggest winter of activity we've ever had in history," said Arvilla E. Warren, San Juan County recorder.

The price of uranium varies, but observers say there has been a dramatic upswing in the past year, attributed largely to the present and future needs of nuclear power plants.

Alice McKinney, Grand County recorder, said just the activity in her office generates considerable revenue, since operators pay \$2 a page for the location notice and pay additional amounts for anything over that page. She said about half the time is spent on uranium claims.

WASHINGTON (AP) — A House Committee is recommending a cut-off of all American military aid to any country that harbors terrorists, but one member says the tactic will have no effect.

The House International Relations Committee voted the one-year cut-off Tuesday, by taking an amendment to a \$3.6-billion U.S. military aid authorization bill. The vote was 14 to 4.

The suspension was proposed by Rep. Lester L. Wolff, D-N.Y., who said a major way of combatting international terrorism would be to give the terrorists no place to flee to avoid punishment.

But Rep. Wayne L. Hays, D-Ohio, said the action would be useless because the three main countries giving sanctuary to terrorists — Algeria, Cuba and Libya — don't get American aid anyway.

Further, Hays charged, if the measure becomes law it could cause a cut-off from countries that unwillingly agree to harbor terrorists to stop them from killing innocent hostages.

In other committee action: —Members approved by voice vote an amendment directing President Ford to report to Congress in 90 days on the prospects for reducing U.S. troops in South Korea.

The rider, a compromise between Ford and members who wanted a gradual withdrawal of U.S. troops from Korea, would require the president to continue to report to Congress on the issue annually for the next five years.

—Members attached to the bill by voice vote a sense-of-Congress provision urging the President to begin seeking U.S.-Soviet negotiations aimed at preventing a naval buildup in the Indian Ocean.

GOP worker Cadillac sees scramble as convertible era ends

DETROIT (AP) — The Cadillac convertible goes out of production within a couple of months — marking the end of the American soft top — and the last-minute scramble is already under way by dealers and customers looking for a piece of history.

A Cadillac dealership outside Chicago says it's willing to pay \$2,000 above factory cost to get its hands on a 1976 Eldorado convertible. An auto dealer north of Miami says the car is a better investment than the stock market.

Cadillac, the last of the U.S. auto makers to offer a rag-top, announced last fall that it would build only 14,000 convertibles during the model year, which normally ends in the summer.

But the demand has been so great — sales are running better than double the 1975 pace — that the division expects the last one to roll off the assembly line by late March or early April. Some 9,500 were built through January.

ZCMI Bridal Bazaar

Y to face CSU, UW

By BRAD REMINGTON
Assistant Sports Editor

A Cougar squad that keeps bouncing back after disappointing last-second-shot losses, will try to escape the lower confines of the WAC in games against Wyoming and Colorado State this weekend. BYU, which has a deceiving 1-4 conference record after losing three games by a margin of four points, will meet the Cowboys in Laramie tonight and then will battle

the Rams in Fort Collins Saturday night.

The three teams won one game between them last weekend, with the Cougars picking up the only victory in its tilt with New Mexico. However, BYU dropped a close one to UTEP, while Wyoming played close games with the two Arizona schools.

Wyoming goes into tonight's game with a 0-5 WAC record and an 8-10 mark overall.

Wyoming tall

The Cowboys starting forwards and center all measure 6-9. Even so, statistically, Wyoming is the second worst rebounding team in the conference. Only Colorado State, with the shortest starting lineup in the WAC, is worse on the boards.

Senior John Robinson, a 6-2 guard from Oyster Bay, N.Y., is the leading scorer for

the Cowboys, averaging 12.3 points per game. Center Pat Flanagin and forward Craig Shanor are also scoring in double figures for Wyoming.

Wyoming is second in the conference in scoring defense, allowing only 59.2 points a game in WAC contests. Only UTEP has given up less points per game.

The Cougars have a streak of eight straight victories against Wyoming. The last time the Cowboys beat the Cougars was at the end of the 1971-72 seasons. BYU leads the series with Wyoming 55-47.

Accurate shooters

In the Colorado State game the Cougars will be going against the WAC field goal percentage leader. The Rams are hitting better than 50 percent from the field and also lead in free throw percentage with a .737 mark.

The Rams, who start five seniors, have four players scoring in double figures. Forward Lorenzo Cash from Dayton, Ohio, leads the team at a 16.9 clip, while Barry Sabas, a guard from Hawaii is averaging 14.5.

Colorado State's weakness is on the boards, as it lacks a big man in the middle. The Rams center is 6-8, while the starting forwards stand 6-5 and 6-6.

Entering the game with a 2-3 conference mark and a 6-11 record overall, the Rams will be trying to move into the top half of the WAC standings.

Both games start at 7:30 and will be broadcast by KSL radio.

In other conference action this weekend, Utah will meet Colorado State on Friday and on Saturday Arizona battles Arizona State. New Mexico goes against UTEP, and Utah is pitted against Wyoming.

Tim Mould goes up for a shot over a New Mexico Lobo in last weekend's cage action.

Universe photo by Jill Higbee

Y women cagers meet CSU today

The BYU women's basketball team will travel to Colorado to take on Colorado State University today and then move on to Boulder to play a tough Colorado State University game on Saturday.

CSU, with a 1-3 conference record is not expected to give BYU much of a tussle, but Colorado with a 3-1 count is "much taller and quicker, and will use a full-court press throughout most of the game," according to Coach Elaine Michaels.

The Cougars are right behind CU with a 2-1 conference mark and find themselves in fourth place in the Intermountain race.

The Y will be paced by Jan Peterson with a 12-point-per-game average. Mona Stevens, who scored 19 points last week against Wyoming and is averaging 10.8 points per outing, will also be a plus for the Cougars.

The Y should get strong support on the boards from forward Terrie McAdam, who is hauling down an average of 8.2 rebounds a game, with center Melanie Sorenson and ex-Ricks player, Jeanne Tuft, each averaging 6.2 per game.

The Cougars will not return home to the friendly confines of the Smith Fieldhouse Feb. 20, when they enter Weber State.

Future looking bright for young Y gymnasts

By LISA GUNN
Universe Sports Writer

Recruiting efforts have brought the BYU gymnastics team six freshmen who will turn the Cougars' program upside-down, according to Coach LaVon Johnson.

All-around men Timothy Dopp, Bernhard Hoeger, Arnold Neville, Isamu Maesato, Perry Walrack and Bryn Johnson are fast becoming superb gymnasts, and fans can expect exceptional performances from them this season and in seasons to come, Johnson said.

Timothy Dopp, a freshman in design technology from Latispell, Mont., was recruited when Coach Johnson saw him perform at a Montana state meet last March.

Dopp's goal this semester is to qualify for the nationals, which means he would have to be one of the top three gymnasts in the WAC competition. His long-range goal is to win the NCAA side-horse competition before graduating in three years, he said.

Bernhard Hoeger was recruited from Merida,

Venezuela. Since there is not gymnastics program in the Venezuelan schools, Hoeger performed under the tutelage of his father, Eberhard Hoeger, who is head gymnastics coach at the University of the Andes.

In 1973 and 1974, Hoeger placed first in the Venezuelan all-around event. After graduating from the Y, he plans to return to his country and compete for the national team.

Arnold Neville, majoring in chemistry, is from Durban, South Africa. He placed fourth in the South African championships when he was 13.

Neville's ultimate goal is to go to the Olympics. Since for political reasons South African citizens cannot enter the games, Neville hasn't decided how he will realize his goal, but says he is determined to try.

Isamu Maesato, from Okinawa, Japan, is majoring in physical education and plans to coach gymnastics.

Maesato was one of the top eight gymnasts in all the high schools in Japan. Coach Greg Sana knew Maesato's high school coach, and arranged for the gymnast to come to

BYU. Maesato said he didn't pay much attention to his English classes in Japan, so the language continues to be a challenge to him.

Perry Walrack, a pre-dental major, was originally from Great Falls, Mont., but now calls Honolulu, Hawaii his home.

He started in floor exercise three years ago and moved to all-around a year later. Walrack's goal for this semester is to score 4.8 out of a perfect 6.0 at a meet.

His long-range goal is to become BYU's best all-around man. Bryn Johnson, from Mesa, Ariz., is majoring in sociology and plans to attend law school after graduation.

Y women swimmers to compete

BYU's women's swim team will battle Arizona and 15 other entrants Friday and Saturday in the Arizona Invitational.

"Arizona State should be favored to win," said Coach Tim Powers. "But we have a good chance to finish in the top five."

The Cougars are coming off a winning dual meet with Nevada-Las Vegas, when they almost doubled UNLV score at 67-35.

Lisa Nelson, a freshman from Fairfield, Calif., qualified for the nationals by winning the 100-yard invitational medley in 1:03.8 against UNLV. She received support from sophomore Liz Young, who also picked up two first places in the 50- and 100-yard freestyle events.

Another double winner was Orem freshman Dorothy Black, with wins in the 100-yard butterfly and the 100-yard breaststroke.

Distance swimmer Sue Jefferys, a freshman from Oregon, placed first in the 500-yard freestyle and second in both the 100-yard butterfly and 200-yard freestyle.

Gymnasts to host critical dual meet

BYU's most important dual meet of the season in gymnastics takes place tonight at 7:30 p.m. at the Suna Fieldhouse when the Cougars host two-time WAC champion Arizona State.

"This meet should give us an idea of how well we can do in the WAC meet," says Coach LaVon Johnson. "The specialists are outstanding so we'll need some strong performances from our all-around men to stay close."

ASU, ranked third nationally, is led by All-American L.J. Larson, the best gymnast in the country on the side horse. He is averaging 9.42 and has a high of 9.75.

The top marks of the Sun Devils' other standouts are 9.7 by Herb Hansen on the high bar, 9.55 by Larry Cox on parallel bars, 9.45 by Mark Dedrick on the long horse, 9.4 by Craig Kirby in floor exercise and 9.3 by Rick Hall on still rings.

ASU is averaging 208.4 after eight dual meet wins but their road average is 203.7. In their only previous home appearance the Cougars scored 204.25. BYU is averaging 202.9.

Sore shoulders could influence tonight's meet. Scott Barclay of ASU has been scratched from the still rings and BYU's Arnold Neville is doubtful on the rings. But Donovan Sparhawk, who had to miss last weekend's trip to Northridge and Long Beach, is expected back at full strength.

The other all-around entry for BYU is Isamu Maesato while Barclay is joined by Dedrick and Gary Rust for ASU.

'Man and Molecules' radio program to start

"Man and Molecules," a weekly radio program focusing on recent scientific advances, will be broadcast on KBYU-FM beginning Saturday at 7:30 a.m.

The 15-minute programs are geared for a general audience, and most of the shows deal with medicine, public health, consumer interest or the environment," said Steve Goates, Y-Chem Society president.

The series has been running for 14 years and is currently aired by more than 550 radio stations.

The show features scientists Glenn Seaborg, Jacob Bronowski and Linus Pauling, said Goates. Titles of the first programs to be broadcast on KBYU-FM are "Stream Quality," "The Mold Problem" and "Marijuana and Medicine," he added.

Audio mixer Jon Holloman controls the board at the sound stage of the BYU Motion Picture Studio.

Near completion

Y sound stage opens

By MICHAEL TODD WAGNER
Universe Staff Writer

Recordings is taking place on the sound stage of the BYU Motion Picture Studio even though the addition is not yet complete.

Musicians are using the new facilities to record music for the BYU Folk Dancers, said Robert Stum, head of production for the Division of Media Development and Production.

Hurried completion of the sound stage was necessary because of the demand for the facility, Stum said. The sound studio is already booked through March, he noted.

Not yet completed are the executive offices, a 50 seat theater, a rehearsal room, film editing rooms and a room for recording machines, he said. Most of the structural work is finished but painting, cabinetry, and theater seating. Work will be completed soon except for minor details, he said.

Services expand

Stum said the services of the Motion Picture Studio have expanded during

recent years. Operations were once entirely film oriented, but now include television, filmstrips, recordings and workshops for BYU students of communication, he said.

The sound stage and booth, where the monitoring and control of material being recorded takes place, were workable late last month, said Dean VanUitert, manager of Sound Services. He said the equipment still has problems, but it compares favorably with the studios of other colleges.

The new recording equipment is sophisticated and expensive, Stum said. A console monitors as many as 16 different recording tracks using television screens rather than meters, he said.

Recording machines

Recording machines are kept in the booth now, but will later be moved to a room which will hold machines for recording the various types of media, including records, movies and filmstrip soundtracks.

Subfloor tunnels, accessible by panels in the floor, will provide passage for the numerous cables from the studios and

control booth to the recording room.

A projection booth, located between the sound stage and the viewing theater, will allow the equipment to be used for either room, he said.

Stum said the theater addition will be used to view films and add music to their soundtracks. The projection of films in the sound stage will allow better narration, the dubbing of dialogue into a foreign language with correlation between sound and lip movements and the replacement of unsatisfactory dialogue.

Dialogue and imitation location sounds can be added in the studio, Stum said. Nine "Foley pits" in the floor of the sound stage will be filled with materials such as straw and gravel. An actor will be able to recreate the sounds of his foot falls while watching the film.

Both internal and external noise was an important consideration in the building's design, he said. The architect was careful in designing the building to provide double doors between rooms and various acoustical materials have been used to eliminate sound problems.

His music's 'tops' even minus words

By TOM O'DELL
Universe Staff Writer

"Lee Holdridge Conducts the Music of John Denver" kind of album that fits in just about anywhere. The most of which were big for John Denver, are present mellow orchestrations, but not the type that lull listeners to sleep.

Even minus the words, the record is relaxing, entertaining.

Holdridge's background indicates the quality expected on his album. He arranged the music for the movie "Mahogany," the theme for the ABC Mystery Neil Diamond's Jonathan Livingston Seagull album worked with Barbara Streisand, Helen Reddy, Anne and Gordon Lightfoot.

Past accomplishments do not assure success but Holdridge talent may produce a bright future.

The songs of the album range from such early Denver as "Rocky Mountain High" to his more current "Clay" and "Fly Away." Although the words that made the popular are conspicuously absent, with the exception some words used in "Sunshine On My Shoulders," the instrumentation compensates nicely.

Over all, the songs that seem to stand out as a little better than the rest are "Annie's Song," "My Sweet Lady" combination of "Follow Me/Leaving On A Jet Plane" selections take full advantage of the more than 40 m of Holdridge's orchestra.

The wisdom of using John Denver selections is apparent when listening to the record. There are no obvious lyrics or the music or the performance. The album is very good for John Denver fans and those who enjoy easy listening music.

Peanuts Shakespearean troupe film to air faced with bankruptcy

Another Peanuts special comes to life Wednesday on CBS with "Be My Valentine, Charlie Brown."

"The world of kids is a rough one," says artist-writer Charles M. Schulz, creator and childhood prototype of Charlie Brown.

"A lot of what poor Charlie suffers, we've all suffered," continued Schulz.

"It was like mail call in the army," Schulz recalled of one Valentine's Day. "Everyone gathered in a group while the names of the lucky recipients were called out. The non-receivers kind of slunk away pretending not to care."

STRATFORD, Conn. (AP) The American Shakespeare Theatre needs \$300,000 by April 1 to guard itself against the tooth of time and the razor of oblivion.

Not that the 22-year-old theater, one of the nation's major producers of Shakespearean drama, arrived at this winter of discontent without foreboding. For the past two summer seasons, theater officials have harbored fears of closing.

The theater already has canceled a preseason student program and must close entirely April 1 if it cannot

raise \$300,000 to get a matching grant.

Board chairman Harold Shaw said Wednesday the need to cancel the program was an expected 70,000 students was a "tragic decision."

Despite a healthy 73 percent average attendance last season, fund raising for the 1,534-seat theater fell short of hopes, AST president Konrad Matthei said.

As a result, it was unable to raise about \$280,000 to match last year's Ford Foundation grant, a requirement of Ford's

five-year grant program, he said.

The needed amount doesn't seem so deep as a well, nor so wide as a church door, but "it's enough, 'twill serve."

"We just haven't had the support we need," Shaw said, "particularly from Connecticut's affluent business sector and from substantial contributors."

"The American Shakespeare Theatre is feeling the pinch of our inflationary climate. In the 1960's in America, arts institutions must have a very broad constituency to survive. They can no longer depend on a few major funding sources to pay for their performances."

The foundation's current \$1-million grant program helped make the 1975 season a reality.

Now the theater is listening for the inaudible and noiseless foot of Time.

Central Utah snowmo haven

By STEVE BALDRIDGE
Universe Staff Writer

Snowmobilers in Utah County have one of the state's best areas for snowmobiling. According to a summary of Utah's snowmobile resources, published by the Utah Department of Natural Resources, the district containing Utah, Summit and Wasatch Counties, has more miles of snowmobile trails than any other of the state's eight districts. However, most of Utah also has development plans to accommodate the increasingly popular sport. Registration in the 1974-75 snow season increased to about 14,000 snowmobiles, from 8,200 registered four years earlier, according to the report.

The U.S. Forest Service, working in conjunction with Utah State Parks and Recreation, has established many snowmobile trails and trailheads.

Utah County's Council of Governments has an Off-Road Vehicle Committee which is actively concerned with the snowmobile enthusiast, reported Gene Carly, Program Coordinator. He said the most popular trail close to Provo is the Aspen Grove-Cascade Springs trail, up above Sundance Ski Resort. Also, trailheads are established at Mutual Dell and Tibble Fork, best reached from the American Fork side of Highway 80.

The trail recommended as one of the best in Utah County by Council members is the one at Tibble Fork, which is 50 miles southeast of Provo, on Highway 50.

Snowmobile clubs in Utah County are still in the infant stage. Snowmobile dealers in Provo are not involved with any; ASBYU does not have a snowmobile club, and there are none sponsored by any governmental departments.

There is a snowmobile club in American Fork, under the direction of Bob Cooper. Cooper has a snowmobile dealership in American Fork.

Competitions in snowmobiling are scheduled regularly in Utah, but they are largely dependent on weather conditions. The state championships, under the direction of the Utah Snowmobile Association, were held in Heber Jan. 24.

A competition has been scheduled at Mount Pleasant for the end of February by the association. The date will not be fixed until it can be

certain there will be enough snow for the races. More information on competition can be obtained from Leonard Holezaple, president of the Utah Snowmobile Association, 485-5958.

Those interested in obtaining maps of snowmobile trails can contact the U.S. Forest Service or the Uta National Forest in Provo.

Snowmobilers, while hampered by January thaws, are now getting back into the spirit on trails located in the nearby mountains.

'Across Sea' program to honor Y poet's work

An anthology of poetry edited by Dr. Clinton F. Larson of BYU and Dr. William Stafford of Lewis and Clark College has been chosen to represent the United States in the prestigious Books-Across-the-Sea program.

"Modern Poetry of Western America," a publication of the BYU Press, was the only book of poetry chosen from the United States to be a part of the current exhibit, which will be displayed initially in London, then tour the member countries of the English Speaking Union.

Books-Across-the-Sea is an appendage of the English Speaking Union, and international organization dedicated to promoting world peace, with U.S. headquarters in New York City.

The anthology was selected by a panel of dignitaries from book-related fields who meet

quarterly to select the current books which best represent the social and cultural background of the United States. The U.S. panel then combines its selections with books chosen by panels in Australia, Canada, England, India, and New Zealand to form an annotated list of books which is distributed to publishers, libraries, universities and schools, bookstores, and the branches of the English Speaking Union in an effort to bring a greater understanding between the peoples of the English-speaking nations of the world.

"Modern Poetry of Western America" includes 204 poems from 41 distinguished poets, whose talents illustrate the diverse scenes and peoples of the American West.

Editors Larson and Stafford are both well-known poets and include some of

their own works in the anthology. Dr. Larson is professor of English and poet-in-residence at BYU. His works have been widely published in magazines and literary journals. He has published several volumes of verse, including "The Lord of Experience" and "Counterpoint." He was the first recipient of the Karl G. Maeser Creative Arts Award.

Dr. Stafford also has written several volumes of verse and prose. He won the National Book Award for "Traveling Through the Dark" and has earned numerous other awards, including the Shelley Award, a Danforth Foundation grant, and a Guggenheim grant.

"Sometimes you just can't win," said Russ Tanner. Others will try their hand at the Bad Luck Bowling Party Feb. 13.

'Bad Luck' party planned Friday 1

The Our Gang committee of the ASBYU Social Office will host "The Bad Luck Bowling Party" in the ELWC Games Center during the early morning hours of Feb. 14, according to Jody Foules, Our Gang co-chairman.

Foules said the festivities are scheduled to begin at midnight Friday the 13th and continue until 4 a.m.

Sign-ups for the event will be Feb. 12 and 13 in the Reception Center, ELWC.

For 25 cents admission, students will have unlimited use of the game tables, bowling alleys, miniature golf course, and all electric games, said Foules.

Prizes will be awarded for air hockey, ping-pong, foosball champions. Prizes will be awarded throughout the morning.

Foules said the Will Center is usually closed at midnight, and said all wish to attend the Bad Luck party should be in the Center as close to midnight as possible to avoid being out.

Cheese

Grated Parmesan cheese, an excellent addition to tossed green salad, hard-cooked egg sandwiches.

The Weekend

Today

12:10, 5:10 p.m.—Music Theater Sketches, opera sketches from "Die Fledermaus," "Otello" and "The Magic Flute," Gates Music Theater, HFAC.

2:30 p.m.—Wrestling, BYU vs. Wyoming, SFH.

5:15, 9:15 p.m.—"Death in Venice" (English film); 7:35 p.m.—"Elvira Madigan" (Swedish film), both at International Cinema, 184 JKB.

5:30, 7:30, and 9:30 p.m.—BYU Film Society, "Some Like It Hot," 446 MARB.

6:30 and 8:30 p.m.—"All Mine To Give," at Varsity Theater, ELWC.

7 and 8:50 p.m.—Weekend Movie, "Cheaper by the Dozen," JSB Auditorium.

7:30 p.m.—Gymnastics, BYU vs. Arizona State, SFH.

8 p.m.—Play, "Returning," Margrets Arena Theater, HFAC.

8 p.m.—Male and Women's Chorus, de Jong Concert Hall, HFAC.

8:30 p.m.—Concerts Impromptu, Memorial Lounge, ELWC.

Saturday

8 a.m.—Archery, BYU Invitational Tournament SFH Annex.

2:30 p.m.—Wrestling, BYU vs. Colorado State, SFH.

5 and 9 p.m.—"Elvira Madigan" (Swedish film); 6:40 p.m.—"Death in Venice" (English film), both International Cinema, 184 JKB.

8 and 8:50 p.m.—Weekend Movie, "Cheaper by the Dozen," JSB Auditorium.

KBYU-FM to air '30s, '40s shows

The radio era of the '30s and '40s is back with a new program beginning Sunday on KBYU-FM, announced Val Kendall, promotion manager.

"Old Time Radio," to air each Sunday at 10 p.m., will be featuring programs that were broadcast on radio before television made its debut, Kendall said.

Sunday's program will include "Superman at the North Pole," first broadcast in 1945; "Captain Midnight: The Return of Ivan Shark," broadcast in 1949; and "Jack Armstrong (The All-American Boy) in the Andes," a children's favorite in 1942.

Two mysteries will be aired Feb. 15. "Casey—Crime

Photographer: Bad Little Babe" will be heard along with the 1942 broadcast of "The Shadow: Mystery of Madman's Deep."

A two-part series of "Old Time Radio Classics" will begin Feb. 22 with "The Long Ranger" and "Sherlock Holmes."

The suspense drama "Sorry, Wrong Number," featuring Angas Moorhead, will highlight the second part of the classics series Feb. 29. Also airing that night will be "Fred Allen." A Sydney Greenstreet show first broadcast in 1946.

Kendall said the shows are selected to delight "kids, mystery lovers and those who long for old standards."

Capra film scheduled

A winner of five academy awards and two Laurel and Hardy films are on tap for movie goers at the Angelus Theatre in Spanish Fork this week.

"It Happened One Night," starring Clark Gable, was directed by Frank Capra and eventually took five Academy Awards.

Claudette Colbert co-stars as a millionaire's daughter who finally falls in love with newspaperman Gable.

The comedy team of Stan Laurel and Oliver Hardy star in "Way Out West" and "Saps at Sea." The first film was nominated for an Academy Award in 1938 and features the duo singing "On The Trail of the Lonesome Pine."

The Daily Universe

OPINION—COMMENT

Brigham Young University

News story takes letter out of context

An Associated Press wire story released Thursday has succeeded in doing what makes a journalist throw up his hands in despair—it created news where there is none.

The story tells of a "great debate" over Neil Diamond's appearance on campus that has appeared in the Daily Universe's letters-to-the-editor section over the past few weeks. The last letter on the subject was printed over a week ago, and only five letters were printed on the subject.

The story cites a letter written by Michael Jeffers of Las Vegas, Nev., as evidence that many students do not want Diamond to appear because he might corrupt BYU students. That letter is taken completely out of context.

A good look at Jeffers' letter reveals a great deal of sarcasm, stated in an obvious effort to say that we shouldn't impose our dress and grooming standards on non-LDS persons.

Jeffers goes so far as to say that if we maintained our standards for all artists to appear on campus, we would prevent even the Osmonds from appearing at BYU, if they wanted to.

One of the letter writers, Timothy F. Bone of Davis, Calif., recognized Jeffers' letter as being sarcastic and said so in his response. Jeffers himself said he was "poking fun" at an earlier letter and did not expect to be taken seriously.

In fact, the only letter the Universe received that advocated anything of the type written in the news story was written by Ron Nelson of Seattle, Wash., protesting an ad run in the Universe showing a picture of Diamond, and not the appearance of the singer on campus.

The fact that a newsmen could take the letter out of context and contrive a news story out of it is amazing. It shows not only extreme naivete, but also demonstrates a kind of sensationalism that tarnishes every journalist's reputation a bit.

Y's & Wherefores

Editorials generally are simply one person's opinion in a sea of opinions.

So why do people always get so frantic about some nobody's comment on life? He may be way out in the cornfield as far as you're concerned; a poor misguided soul, at worst.

There are people who consider it their calling in life to respond to each and every editorial as though their very moral fiber had been called into question. They write letters attacking not only the expressed "misguided" opinion, but the author's personality to boot.

That kind of violent reactions could be evoked from an editorial discussing the weather?

Imagine someone mildly commenting that he felt the blizzard last Monday was somewhat uncomfortable for him. The Universe would be besieged by letters from skiers attacking the letter as being idiotic because it did not take into consideration the skiers of the world. The writer would be accused of being an anti-Four-Seasons-project person, an opponent of ski resorts of any size, shape or form and probably an incognito member of the Communist Party.

BYU students, think before you lift your poison pens.

How many letters does the editor receive in response to the weekly issue of today? People seem to love clanking at trivia. I'm considering submitting an editorial to the Universe entitled "The Mormon Church is True." But someone would probably say I was just trying to stir up the non-members at BYU. You just can't win.

—Gail Newbold

"And we're going to halt creeping bureaucracy if we have to expand this agency a hundredfold to do it!"

Writing skills decreasing

A local high school English class received instruction only four days a week, the fifth day, Friday, was reserved for parties. And people wonder why skill in writing is decreasing.

In some California high schools it is possible to graduate without having completed the school's educational requirements. It is done by passing a test.

In many high schools, very few classes in composition are taught. Offerings such as science fiction and writings of different minority groups are more prevalent. And people wonder why skill in writing is decreasing.

A student can graduate from a high school, supposedly having basic writing skills, but not

able to communicate in writing, let alone know the usage of the parts of his language.

How many high school graduates, or college students, can identify and correct errors as faulty parallelism, misplaced modifiers or mixed metaphors?

English instruction is not what it should be.

The National Assessment of Educational Progress found that writing skills have been slipping since their first testing of Americans in 1969. In that year they found that 17-year-olds demonstrated serious deficiencies in spelling, vocabulary and sentence structure and that participants over 18 were reluctant to write, according to a recent Newsweek Magazine article.

Does security require record defense price?

Security is not available at bargain basement prices according to the nation's new defense secretary, Donald Rumsfeld. Obviously this seems to be the case. The defense department is courting Congress to the record tune of a \$100.1 billion defense budget.

It seems interesting that this request is made in the wake of recent negotiations between the Soviet Union and the U.S. State Department concerning a new nuclear arms limitation agreement.

Doesn't the defense department have any confidence in Dr. Kissinger's skills in the diplomacy of defense?

Perhaps they have received the word from a new intelligence leak that Dr. Kissinger has just assured Soviet leaders we will award them 50 billion tons of wheat for each year they can out produce us in the nuclear arms race.

Rumsfeld's request for the \$100.1 billion defense budget certainly causes one to question the nature of current nuclear arms talks between the U.S. and the Soviet Union.

Little of any detail has been given to the U.S. public concerning these talks.

Cuts in the requested budget would create an unstable world, Rumsfeld has said.

It is indeed true then that stability or security cannot be had at some lower price or is it possible that stability can even be bought at this fantastic price?

In a report to Congress last week, Rumsfeld said the proposed budget was as low as possible and if continued arms limitations talks with the Soviet Union are not successful even more money will be requested.

However in the same report Rumsfeld the current U.S. forces are adequate to balance the Russian's present arms. If all of this is true, then why the budget request?

Rumsfeld says the increase is to the cost of building a fleet of supercavitating and cruise missiles.

More land based missiles.

If, as Rumsfeld said, U.S. forces provide adequate balance, then why developing these new weapons?

Haven't the Soviets and the U.S. around their ideological differences forth full integrity in support of their arms limitations agreements?

Then why is the doctor continual over to Moscow to rework the agreements? And finally, why Washington insist on calling this expensive?

—Bon

Time. There is either too much enough.

People do not lack time, says Alan an expert on time and author of the "How to Get Control of Your Time" Life.

Dr. Lakein says to use time efficiently practical goals must be set. Procrastination is not beneficial. Set priorities on goals, the most important ones first.

Many people are busy doing not have a career or a job. They are they do not relax. Some spend most time organizing.

Rushing to class and flunking the test is not a glorious feeling. Evaluation of time which resulted in the time behavior was spent is important improvement is to be made.

This does not mean plain horsing around is not beneficial. Remember to do what be on top of the list first. Running time means there is another 24 hour again.

—Mavane

Readers tell views on art, divorce

All letters submitted for publication must bear the writer's full name, signature, hometown and local telephone number. Letters must be typewritten, double-spaced and should be limited to 250 words or less. Preference will be given to short letters. All letters are subject to condensation. Letters should be mailed or brought to Student Publications, 538 ELWC.

Council acted correctly

Editor: While I was personally saddened by the news that the Executive Council had removed Dan Morgan from the vice presidency of the Social Office, I feel that the council acted correctly in fulfilling the stewardship placed on them.

This has been a banner year for student government. Programs have been instigated which have been more pertinent to the student and meeting his needs than ever before. Dan Morgan has been the person responsible for many of those programs. However, the ASBYU Constitution has set out the qualifications for office, and if an officer fails to meet those requirements he must be subject to a penalty. For the Executive Council to act otherwise would make a travesty of the Constitution.

Therefore I must conclude that the members of the Executive Council must be commended for making a decision that I know was very hard for them. It is a healthy sign for student government when such an emotional situation can be handled with fairness and dispatch.

Again I express my sympathies to Dan, for his mistake has been a very costly one personally, however I feel that if Dan is concerned for the good of ASBYU he will know that the disposition of his case has strengthened the good that student government has done this year.

—Raymond R. Smith

Council acted incorrectly

Editor: I was truly dismayed at the occurrences attendant to the dismissal of Social Vice-President Dan Morgan on Thursday.

We should not overlook the fact that the ASBYU Constitution does not spell out a penalty for Morgan's offense, thus the penalty must be set by the Executive Council.

Previously, the Supreme Court had totally out-stepped its bounds by recommending Morgan's resignation. The court is not supposed to recommend, and no rule in fixing penalties unless such penalties are expressly stated in The Constitution.

The ASBYU Executive Council met prior to Thursday's actions and tentatively approved a by-law stipulating dismissal for hour shortages such as Morgan's, but knew it could not extend the provision "ex post facto."

Seemingly, then, Morgan's impeachment and conviction had become a foregone conclusion after the Council's clandestine meeting Wednesday night.

I, with others, was present at Thursday's council meeting to suggest alternative penalties, including stiff fines, limitations, etc. to which Morgan would have acceded to remain in office, albeit under a heavy onus which would have provided a significant deterrent and meaningful precedent while allowing an effective official to continue to serve in the office to which he was elected.

Nevertheless, I was prevented from speaking out when I had the floor by council members who forced a vote on impeachment before such viable alternatives were considered.

Thus, I cannot help but feel that political expediency dictated the subsequent actions, and not the mercy and consideration of student interests which is or should be our right to expect.

—Steven Nelson
Yuma, Arizona

Art neither means nor end

Editor: In regards to Saint Cassity (Jan. 26) and Saint Pier (Feb. 4):

Art is neither means nor end: it is a by-product, as testimony is a by-product of absorbing and practicing the right skills.

If we serve the Lord and diligently learn and practice our proper techniques, we may produce art—that is not for us to say; but if we aim at producing a work of art, and not all, if we aim at producing a great work of art—we shall fall victim to our self-consciousness and presumption and produce mere sentimentality or preciosity.

—Arthur H. King
Professor of English

Health plan not giveaway

Editor: Concerning the letter of Mr. Jenkins about a marrieds health plan:

For myself, I suggest anything similar to a free government giveaway. All the editorials suggested was a plan equitable, in cost and service, to the singles' health plan. This seems fair to me. However, to Mr. Jenkins manner of thinking perhaps terms like "fair" are equitable, at least where married students are concerned, are examples of left-wing speech.

For myself, I have given up on many student-parents sit at home worrying about their sick children because they cannot afford a visit to a doctor. Indeed, there are doctors

who work out discounts and payment with students. However, the cost of office visit is generally greater than semester cost of the singles health plan. In an equitable marrieds health plan, it is evident.

For the information of you single's planning marriage, Wymount Terrace has a recent campus speaker, appoining you do continue to use the clinic y have to take your dependents after-hours, like some thief in the night.

—Don Jackson

Utah divorce above average

Editor: Several times lately we have heard charge that Utah's divorce statistics alarmingly above the national average. The explanation, in my mind, is that for one important factor which has affected our comparative standing.

A state Family Health Services office was recently contacted, and we attributed the problem largely to the fact that Utahns tend to marry younger. But only part of the picture. Surely one of our youth appear to cohabit at a young age is that more of them do so traditionally acceptable way, via marriage.

Out of a still predominantly LDS population, even those who do not qualify for marriages are doubtless more constrained seek civil marriages than to adopt the "love" life style so much in vogue elsewhere. When such marriages fail, legal divorce tends to ensue and be counted in population surveys the way unit couples who later become dissatisfied.

In an earlier generation, far more couples would also have married consequently divorced than is the case now. The only way to know for sure whether Utah has a rising rate is increased or not is to compare the present ratio of divorces to marriages for that previous years, paying attention to the age groups of the couples without becoming complacent, we least know if the stability of Utah marriage is on a serious decline or holding its own to what extent.

This is not to dispute that Utah's rate is in fact above the national average; this is anything new. It is likely Utah a higher percentage of marriages from parental and other forms of pressure, particularly in the pregnancy, where elsewhere immaturely seriously incompatible couples encouraged to resolve the problem by means, e.g. abortion. This would, over in turn contribute to a higher divorce rate. How substantially such ill-matched marriages are subsequently disproportionately offset the presumable common short term premarital relationship that occur elsewhere would be hard to establish and has, I suspect, still not adequately studied.

I invite our sociologists and publicists to come forward with further data that both more relevant and also less sensational.

—Thomas P. Honors P

Cassity: Art not end in itself

Perhaps the one thing worse than being misrepresented in one's own article due to careless editing is being misrepresented in a responding article due to equally careless misreading of the few coherent thoughts which survived in the original. I opened Wednesday's Daily Universe to find that one Steve Piersanti had pitted my views on Mormon art against those of Elder Boyd K. Pakker, and I noted that Mr. Piersanti very wisely sided with Elder Pakker. Some vague indefinable intuition somehow gave me the impression that the outcome of this particular match had been fixed.

Mr. Piersanti may have some insights which I do not have, but I do not believe that my essay and Elder Pakker's fireside address are fundamentally opposed. Both expressions were honest responses to an important topic, and the fact that they did not reach identical conclusions only means that the topic was being treated by different personalities with different perspectives.

Certainly, Mr. Piersanti's version of parts of my essay is contrary to the tone of Elder Pakker's talk. However, if I read my article correctly, at no time did I ever say that art is an end in itself. I simply do not believe that. My statement was, "If... art is considered as part of the end, that is, as an integral part of truth, then it may

be pursued with sufficient purpose and sincerity to produce works of lasting value."

To say that art is a part of the truth is absolutely not equivalent to saying that art is an end in and of itself. Church membership is not an end in and of itself; education is not an end in and of itself; marriage is not an end in and of itself; even having a family is not an end in and of itself. All these things are parts of a whole which we can't fully comprehend but which we refer to as happiness or exaltation or eternal progression. Faith, knowledge, love and those who are all parts of what we call truth, not ends in and of themselves, but we value them intrinsically just the same. If art is a legitimate part of this dialectic of truths, then Mormon art should not constantly be called upon for pragmatic justifications of its existence.

My article was directed to church members who value art only for its advertising potential, those who are not satisfied until "great," "historic," and "magnificent" are pasted on upon every visible surface of Mormon art. These members seem to think that such a prostitution of art is justified because it attracts attention to the church. There is a very fine line between letting your light shine before men and loving the church seats in public places. If luring people to the Church were the only motive in producing Mormon art, then we could just as effectively

offer cash rebates, increased sex appeal and easy credit and avoid the temptation to glory in our "greatness."

We do not believe, however, in styling the truth to please the masses. We do not teach abstinence, sacrifice or dedication because they are attractive, but because they are true principles. If art is a part of truth, then we should value it on its own merits. If we sing, or dance, or paint, or write, we should do it because it is delicious to our souls, and not because the Associated Press might be watching.

I credit Mr. Piersanti that the second major point of my essay was correctly represented. Although I am not absolutely certain of the reasons for the LDS artistic drought, I do know that Mormon artists work in a very discouraging environment. Criticism is constantly leveled at artists, and they are often characterized, among other things, as being worldly, rebellious, moody and capricious. I, myself, am constantly exhorted to stand up, to sit down, to fight, fight, fight, to stand up, to sit down, to fight, fight, fight. It is a gospel of love, so may I therefore request that whoever decides to walk all over me next please remove his cleats first.

—Kris Cassity
